Dear Hiring Committee,

I am writing to express my interest in the Operations Analyst position at Uline's Edmonton Branch. With a Bachelor of Computer Science from the University of New Brunswick and several years of experience in a manufacturing environment, I bring a unique combination of systems development, data analysis, and operational insight that aligns well with the goals of this role.

In my current role as a Process Analyst at BWS Manufacturing, I have developed and maintained tools that directly support production and logistics efficiency. My work spans the full lifecycle of system implementation—from gathering business requirements and designing logic, to deploying interactive dashboards using SQL, Access, Streamlit, and Python. I've worked closely with cross-functional teams to translate data into process improvements, driving measurable results in areas such as scheduling accuracy, inventory management, and production reliability.

My technical skill set includes SQL, VBA, MS Access, Excel, and Python, along with experience integrating ERP systems (Syspro) into broader reporting pipelines. I am particularly drawn to Uline's emphasis on actionable insights and continuous improvement. I believe my ability to identify trends, clarify root causes, and present findings clearly would be an immediate asset to your branch operations team.

Uline's reputation for operational excellence and employee development is what attracted me to this opportunity. I am eager to bring my passion for systems thinking and data-driven problem solving to a fast-paced, collaborative environment where continuous improvement is valued and rewarded.

Thank you for considering my application. I look forward to the opportunity to discuss how my experience and enthusiasm can contribute to Uline's success.

Sincerely  
Avery Briggs
