

Professional Summary

Data Analyst and Business Systems Analyst with 5+ years of experience supporting operational reporting, analytics, process improvement, and database systems within a manufacturing environment. Experienced in developing SQL queries, building dashboards, analyzing large datasets, automating reporting processes, and investigating operational issues. Known for identifying trends, improving data visibility, validating data accuracy, and translating technical findings into actionable business recommendations. Strong background collaborating with operational stakeholders to improve efficiency, reporting accuracy, and decision-making.

Experience

Business Systems Analyst

BWS Manufacturing Ltd. | Centreville, N.B. (Jan 2021 – Mar 2026)

Developed reporting systems, analytical tools, and database solutions supporting operational workflows across Sales, Procurement, Production, Scheduling, and Inventory within a small technical team in a manufacturing environment.

- Researched, validated, and analyzed operational datasets to ensure accuracy across inventory, procurement, manufacturing, and sales systems.
- Developed complex SQL queries and reporting tools enabling cross-department analysis of operational performance, inventory trends, purchasing activity, production metrics, and sales data.
- Conducted root cause investigations into data discrepancies, reporting anomalies, and process failures by reconciling information across multiple systems and historical records.
- Built dashboards and reporting solutions used by management and senior leadership to improve visibility into operational performance and support business decision-making.
- Automated recurring reporting processes using SQL, Python, VBA, and Streamlit, reducing manual effort and improving reporting consistency.
- Performed structured analysis of large operational datasets to identify trends, bottlenecks, and opportunities for process improvement.
- Developed validation tools and exception reporting processes that improved data quality and reduced reconciliation errors.
- Collaborated with management and operational departments to gather requirements, document processes, and develop practical reporting solutions.
- Produced technical documentation, process documentation, and user guidance materials supporting long-term system maintenance.
- Provided troubleshooting and support across ERP systems, databases, reporting platforms, network devices, and third-party services.
- Presented analytical findings and operational insights to management, helping support data-driven business decisions.

Notable Projects:

- IT Request and Inventory Ticketing System. Developed using SQL Server and Microsoft Access to improve issue tracking and reporting visibility.
- Warehouse Analytics and Visualization Platform. Developed reporting and visualization tools that mapped inventory locations and warehouse activity to improve operational transparency and planning.
- Yellow Tag Variance Reporting System. Developed an automated system to identify, track, and report inventory shortages and production variances using live ERP data.
- Automated Report Generation Platform. Created a fault-tolerant reporting workflow capable of generating and validating up to 50 reports per execution through a Streamlit interface.
- Legacy PDF Data Extraction System. Developed OCR-based tools to extract and analyze historical operational data from PDF reports using Python.
- Administrative Time Tracking and Approval Interface. Developed a management reporting system integrating live ShopClock data to improve workforce visibility and payroll review processes.

Other Job Experience:

- Basketball Referee – CBOC – Fredericton, NB – Oct 2013 – Mar 2020 – P/T.
- Kitchen Staff – FMI – Fredericton, NB, -- May 2015 – Sept 2017 – P/T & F/T.
- Farm Hand – Hunter Brother's Farm Market – Florenceville, NB, -- Jun 2011 – Aug 2013 – Seasonal F/T.

Education

Bachelor of Computer Science

UNB – Fredericton N.B. (Sept 2017 – May 2020)

- Specialization: Software Systems.
- Recipient of Governor Thomas Carleton Entry Scholarship.

Skills

- **Languages:** English (native), French (Intermediate professional proficiency).
- **Programming & Data Analysis:** SQL, Python, VBA, Java.
- **Databases:** SQL Server, Microsoft Access.
- **Data & Analytics:** Excel, Pandas, Streamlit, Plotly, Data Validation.
- **Frameworks & Technologies:** Streamlit, REST APIs, Reporting Automation.
- **Automation & Integration:** OCR, PDF parsing, API integration, workflow automation.
- **Tools:** Git, Syspro8 ERP, ShopClock.

Awards & Activities

- Finalist (Top 12) - Kaspersky Academy Partner's Summit (KAPS) Lisbon, Portugal (Dec 2019).
- Certified intermediate plus in the French oral proficiency exam CNHS (June 2013).
- UNB dormitory orientation committee (Sept 2014) & Social Representative (Sept 2014 – Apr 2015).
- UNB Relay for Life steering committee logistics team (Sept 2013 – Feb 2014).

Hobbies

3D printing and hardware projects, sports analytics software, recreational athletics (cycling, kayaking, basketball officiating).
