Dear Hiring Manager,

I am excited to apply for the Senior Inventory Manager opportunity.

While my title has been Process Analyst, the majority of my work has focused on supporting inventory management, warehouse operations, purchasing, and production through data analysis and reporting. Rather than developing customer-facing software, I worked closely with operational teams to provide the information needed to make better inventory and purchasing decisions.

At BWS Manufacturing I became the primary resource for many inventory and operational reporting initiatives. Working extensively with SYSPRO ERP data, SQL Server, Microsoft Access, Excel, and custom reporting tools, I developed solutions that improved inventory visibility, production planning, warehouse operations, and management reporting. My work frequently involved analyzing inventory records, identifying trends, automating reporting processes, and transforming large datasets into actionable information.

While I have not yet worked with Slimstock, Infor SX, or Cognos, I have successfully learned new ERP systems and reporting platforms throughout my career. My experience developing analytical solutions using SYSPRO ERP, SQL Server, Excel, and Microsoft Access has allowed me to quickly adapt to new technologies and deliver practical reporting tools that improve operational decision making.

What particularly attracts me to this position is the opportunity to take ownership of inventory analysis and contribute to inventory forecasting, inventory optimization, and data-driven evaluation of vendor performance across a large multi-warehouse operation.

I would welcome the opportunity to discuss how my experience can support your inventory management team. Thank you for your time and consideration. I look forward to speaking with you.

Sincerely,

Avery Briggs
