

Professional Summary

Analytical inventory and operations professional with over five years of experience supporting inventory management, warehouse operations, purchasing, production planning, and ERP reporting within a manufacturing environment. Experienced analyzing inventory trends, improving reporting processes, and developing data-driven solutions that support purchasing and operational decision making. Advanced user of Microsoft Excel, SQL, Microsoft Access, and SYSPRO ERP, with extensive experience transforming operational and inventory data into actionable reporting for business decision making.

Experience

Process Analyst - Business Systems & Inventory

BWS Manufacturing Ltd. | Centreville, N.B. (Jan 2021 – Feb 2026)

Supported warehouse, inventory, purchasing, and production departments by developing reporting tools, databases, and data analysis solutions used throughout daily operations.

Key Contributions

- Worked extensively with SYSPRO ERP inventory and purchasing data.
- Developed inventory reporting solutions using SQL, Microsoft Access, Excel, and Streamlit.
- Built dashboards allowing warehouse and purchasing to quickly identify inventory issues and operational trends.
- Created SQL queries and reporting tools supporting inventory analysis, purchasing, production planning, inventory forecasting, and warehouse operations.
- Automated repetitive reporting processes, significantly reducing manual spreadsheet work.
- Assisted with inventory reconciliation and investigation of inventory discrepancies.
- Designed inventory lookup and warehouse location tools improving inventory visibility.
- Developed production planning and work-order reporting solutions.
- Created KPI dashboards for management using real-time operational data.
- Collaborated closely with purchasing, production, warehouse, and management teams to improve inventory visibility, reporting accuracy, and operational decision making.

Systems Analysis & Reporting

- Developed and delivered ad-hoc and recurring reports based on stakeholder requests.
- Experience working with large, multi-source datasets requiring validation and reconciliation.
- Strong proficiency in SQL and advanced Excel for data extraction and analysis.
- Experience designing data outputs that are clear, structured, and actionable.
- Comfortable working with sensitive or business-critical data requiring accuracy and discretion.
- Experience improving reporting processes and enabling self-service data access where possible.

Notable Projects:

- Inventory reporting and warehouse analytics dashboards using SQL, Excel, Microsoft Access, and custom analytical dashboards.
- Yellow Tag inventory variance reporting system reducing delays in identifying missing production materials.
- Warehouse visualization and location mapping tool improving inventory transparency and stock lookup.
- Automated operational reporting system replacing manual report generation for recurring business reports.

Business Systems & Technologies:

- Microsoft Excel, Access, VBA, SQL Server, Syspro8 ERP, ShopClock, Python, Streamlit, Pandas, Plotly, Pytesseract, Reportlab, NeWare Security.

Other Job Experience:

- Basketball Referee – CBOC, Fredericton, NB, Oct 2013 – Mar 2020, Part-time.
- Kitchen Staff – FMI, Fredericton, NB, May 2015 - Sept 2017, Part & full-time.
- Farm Hand – Hunter Brother's Farm Market, Florenceville, NB, Jun 2011 - Aug 2013, Seasonal full-time.

Education

Bachelor of Computer Science

UNB – Fredericton N.B. (Sept 2017 – May 2020)

- Specialization: Software Systems.
- Recipient of Governor Thomas Carleton Entry Scholarship.
