

Professional Summary

Systems Analyst and IT professional with more than five years of experience supporting, administering, and improving business-critical systems within a manufacturing environment. Experienced in infrastructure support, vendor coordination, troubleshooting, system administration, inventory management, documentation, and operational support of SQL Server, ERP, Microsoft Access, and cloud-connected business systems.

Recognized for independently managing technical initiatives, coordinating with external service providers, resolving production issues, and developing solutions that improve reliability, visibility, and operational efficiency. Strong analytical and problem-solving skills combined with a customer-focused approach to supporting users and technology environments.

Experience

Systems Support & Operations Analyst

BWS Manufacturing Ltd. | Centreville, N.B. (Jan 2021 – Feb 2026)

Supported business-critical operational, database, reporting, and infrastructure systems within a manufacturing environment while contributing to process improvement and internal software development initiatives.

Key Contributions

- Coordinated with external vendors supporting networking, cloud services, telecommunications, backups, and building security systems.
- Assisted with troubleshooting and resolution of infrastructure, software, hardware, and connectivity issues affecting business operations.
- Supported inventory tracking and asset management systems used for IT equipment and operational resources.
- Maintained technical documentation, operational procedures, and system support materials.
- Participated in deployment, testing, and support of business-critical systems and infrastructure projects.
- Developed internal business applications and automation tools
- Supported ERP, database, reporting, and operational systems used across purchasing, production, inventory, and scheduling departments.
- Coordinated issue resolution between end users, vendors, and technical resources.
- Monitored and maintained SQL Server and business application environments supporting daily operations.
- Created and maintained system documentation, user procedures, and technical reference materials.

Systems Analysis & Reporting

- Experience working with large, multi-source datasets requiring validation and reconciliation.
- Strong proficiency in SQL and advanced Excel for data extraction and analysis.
- Experience designing data outputs that are clear, structured, and actionable.
- Comfortable working with sensitive or business-critical data requiring accuracy and discretion.
- Experience improving reporting processes and enabling self-service data access where possible.

Notable Projects:

- IT Request and Inventory Ticketing System, built using SQL and Access.
- Developed an Access macro and VBA workflow to automate batch report generation, triggered from a Python/Streamlit dashboard. Implemented timestamp validation and fault-tolerant logic to ensure reliable generation of up to 50 reports per execution.
- Developed a “Yellow Tag” tracking system to automatically flag, record, and report missing production parts using live Syspro ERP data. Improved early-stage variance reconciliation and helped identify recurring inventory issues.
- PDF parsing of legacy reports using Python libraries including pdfplumber, Streamlit, and Pytesseract.

Technologies used:

- Microsoft Excel, Access, VBA, SQL Server, Syspro8 ERP, Python, Streamlit, Pandas, Plotly.

Other Job Experience:

- Basketball Referee – CBOC – Fredericton, NB – Oct 2013 – Mar 2020 – Part-time.
- Kitchen Staff – FMI – Fredericton, NB, -- May 2015 – Sept 2017 – Part & full-time.
- Farm Hand – Hunter Brother’s Farm Market – Florenceville, NB, -- Jun 2011 – Aug 2013 – Seasonal full-time.

Education

Bachelor of Computer Science

UNB – Fredericton N.B. (Sept 2017 – May 2020)

- Specialization: Software Systems.
- Recipient of Governor Thomas Carleton Entry Scholarship.

Skills

- **Languages:** English (native), French (Intermediate professional proficiency).
- **Programming:** Java, Python, SQL, VBA
- **Frameworks & Technologies:** REST APIs, Streamlit
- **Databases:** SQL Server, Microsoft Access
- **Data & Analytics:** Pandas, Plotly, Excel, Data Validation
- **Automation & Integration:** OCR, PDF parsing, API integration, workflow automation
- **Tools:** Git, Syspro8 ERP, ShopClock

Awards & Activities

- Finalist (Top 12) - Kaspersky Academy Partner's Summit (KAPS) Lisbon, Portugal (Dec 2019).
- Certified intermediate plus in the French oral proficiency exam CNHS (June 2013).
- UNB dormitory orientation committee (Sept 2014) & Social Representative (Sept 2014 – Apr 2015).
- UNB Relay for Life steering committee logistics team (Sept 2013 – Feb 2014).

Hobbies

3D printing and hardware projects, sports analytics software, recreational athletics (cycling, kayaking, basketball officiating).

Projects

- Developed NHL analytics dashboards using live API data, SQL, Python, and interactive visualizations.
- Built 3D warehouse visualization tools using Plotly to improve operational transparency and layout analysis.
- Developed automation tooling for STL generation and 3D printing workflows using Python and Streamlit.
- Additional exposure includes Android development, OCR tooling, and data visualization applications.
