

Professional Summary

Detail-oriented Systems and Inventory Analyst with 5+ years of experience supporting purchasing, inventory control, ERP systems, warehouse operations, and process improvement within a manufacturing and distribution environment. Experienced in inventory reconciliation, reporting, data analysis, purchasing support, and cross-functional collaboration between warehouse, sales, procurement, and operations teams. Strong technical background with advanced Excel, SQL, Access, and ERP system experience, combined with hands-on operational knowledge from both systems and warehouse roles.

Experience

Systems & Operations Analyst

BWS Manufacturing Ltd. | Centreville, N.B. (Jan 2021 – Feb 2026)

Developed internal software systems and software development tools supporting operational workflows across Sales, Procurement, Production, and Scheduling within a small technical team in a manufacturing environment.

Key Contributions

- Supported purchasing, inventory, production, and warehouse operations through ERP reporting, inventory analysis, and custom system tools.
- Investigated inventory discrepancies, reporting inconsistencies, and operational variances across departments.
- Developed reporting solutions using Microsoft Access, SQL Server, Excel, and Python to improve inventory visibility and operational tracking.
- Maintained accurate ERP-integrated databases and reporting systems supporting operational decision-making.
- Assisted with process audits, inventory investigations, and continuous improvement initiatives.
- Collaborated with warehouse, procurement, scheduling, and sales teams to improve operational accuracy and documentation.

Systems Analysis & Reporting

- Developed and delivered ad-hoc and recurring reports based on stakeholder requests.
- Experience working with large, multi-source datasets requiring validation and reconciliation.
- Strong proficiency in SQL and advanced Excel for data extraction and analysis.
- Experience designing data outputs that are clear, structured, and actionable.
- Comfortable working with sensitive or business-critical data requiring accuracy and discretion.
- Experience improving reporting processes and enabling self-service data access where possible.

Notable Projects:

- IT Request and Inventory Ticketing System. Built from scratch using SQL and Access.
- Developed an Access macro and VBA workflow to automate batch report generation, triggered from a Python/Streamlit dashboard. Implemented timestamp validation and fault-tolerant logic to ensure reliable generation of up to 50 reports per execution.
- Yellow Tag system to automatically flag, record, and report missed parts when picked for production. Offers a variance reconciliation opportunity earlier in the production pipeline, highlighting common trends. Front-end built using an automatically refreshing form presenting live Syspro Data.
- PDF parsing of legacy reports using Python and modules: Pdfplumber, Streamlit, and Pytesseract.
- 3D warehouse visualization using Plotly, demonstrating bottlenecks and improving transparency.

Technologies used:

- Microsoft Excel, Access, VBA, SQL Server, Syspro8 ERP, ShopClock, Python, Streamlit, Pandas, Plotly, Pytesseract, Reportlab, CustomTkinter, NeWare Security.

Other Job Experience:

- Basketball Referee – CBOC – Fredericton, NB – Oct 2013 – Mar 2020 – Part-time.
- Kitchen Staff – FMI – Fredericton, NB, -- May 2015 – Sept 2017 – Part & full-time.
- Farm Hand – Hunter Brother's Farm Market – Florenceville, NB, -- Jun 2011 – Aug 2013 – Seasonal full-time.

Education

Bachelor of Computer Science

UNB – Fredericton N.B. (Sept 2017 – May 2020)

- Specialization: Software Systems.
- Recipient of Governor Thomas Carleton Entry Scholarship.

Skills

- **Languages:** English (native), French (Intermediate professional proficiency).
- **Data & Analysis:** SQL, Python (Pandas), Data Validation, Data Cleaning, Streamlit modeling.
- **Data Extraction:** OCR (Pytesseract), PDF Parsing (pdfplumber).
- **Reporting:** SQL queries, data analysis, visualization (Streamlit, Plotly, Reportlab, among other tools)
- **Integration:** APIs, Python automation, data pipelines
- **Databases:** Microsoft Excel & Access, Microsoft SQL Server.
- **Tools:** Git, Syspro8 ERP, ShopClock.

Awards & Activities

- Finalist (Top 12) - Kaspersky Academy Partner's Summit (KAPS) Lisbon, Portugal (December 2019).
- Certified intermediate plus in the French oral proficiency exam (June 2013).
- UNB dormitory Orientation Committee (September 2014) & Social Representative (September 2014 – April 2015).
- UNB Relay for Life steering committee logistics team (September 2013 – February 2014).

Hobbies

3D printing and hardware projects, sports analytics software, recreational athletics (cycling, kayaking, basketball officiating).

Projects

- Developed NHL analytics dashboards using live API data, SQL, Python, and interactive visualizations.
- Built 3D warehouse visualization tools using Plotly to improve operational transparency and layout analysis.
- Developed automation tooling for STL generation and 3D printing workflows using Python and Streamlit.
- Additional exposure includes Android development, simulation projects, OCR tooling, and data visualization applications.
