Dear Hiring Manager,

I am writing to express my interest in the Java Programmer position with Techladder Inc.. Although my professional background has focused primarily on Python, SQL Server, systems development, and business automation, I believe my experience designing and maintaining enterprise software solutions translates strongly to this role.

Over the past five years, I worked in a systems and process analyst role where I developed internal applications, automation tools, reporting systems, and database-driven business solutions supporting manufacturing and operational workflows. My work regularly involved gathering user requirements, integrating software systems, debugging production issues, optimizing SQL logic, and delivering maintainable solutions in fast-moving business environments.

While Spring Framework and Hadoop are areas where I am still building direct hands-on experience, I have a proven track record of quickly learning new technologies and applying them effectively in production environments. Throughout my career, I have independently adopted new frameworks, APIs, libraries, and development tools as business needs evolved. I am confident I can do the same within a Java and Spring-based ecosystem.

What particularly interests me about this opportunity is the chance to continue growing as a software developer while contributing my strengths in backend systems, database integration, troubleshooting, and business-focused software development. I am highly comfortable working remotely, collaborating across teams, and taking ownership of technical challenges from design through implementation.

I would welcome the opportunity to discuss how my systems development background, adaptability, and problem-solving experience could contribute to your team.

Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,
Avery Briggs

Professional Summary

Systems and software developer with 5+ years of experience designing business applications, automation tools, SQL-driven reporting systems, and internal web utilities in manufacturing and enterprise environments. Experienced building and maintaining full-stack solutions using Python, SQL Server, VBA, Access, and modern web technologies while collaborating directly with operations, procurement, production, and business stakeholders.

Strong background in software integration, database design, process automation, and Agile-style iterative development. Comfortable learning new frameworks and technologies quickly, including Java enterprise ecosystems such as Spring Framework and Hadoop-based data environments. Known for independently delivering scalable tools, troubleshooting complex technical issues, and translating business requirements into maintainable software solutions.

Experience

Systems Support & Operations Analyst

BWS Manufacturing Ltd. | Centreville, N.B. (Jan 2021 – Feb 2026)

Developed internal software applications and automation tools supporting operational workflows across Sales, Procurement, Production, and Scheduling within a small technical team in a manufacturing environment.

Key Contributions

- Developed internal business applications and dashboards using Python, Streamlit, SQL Server, VBA, and Access.
- Built SQL-driven automation tools for procurement tracking, production analysis, inventory visibility, and workflow optimization.
- Wrote and optimized complex SQL queries, views, triggers, and reporting logic against enterprise ERP data.
- Integrated APIs, automated document processing systems, and OCR pipelines for operational efficiency improvements.
- Collaborated directly with end users to gather requirements, troubleshoot technical issues, and implement software enhancements.
- Created scalable reporting and data management solutions used by purchasing, production, warehouse, and management teams.
- Assisted with IT systems support, software troubleshooting, vendor coordination, and technical documentation.
- Worked in Agile-style iterative development environments with frequent stakeholder feedback and rapid deployment cycles.

Systems Analysis & Reporting

- Experience working with large, multi-source datasets requiring validation and reconciliation.
- Strong proficiency in SQL and advanced Excel for data extraction and analysis.
- Experience designing data outputs that are clear, structured, and actionable.
- Comfortable working with sensitive or business-critical data requiring accuracy and discretion.
- Experience improving reporting processes and enabling self-service data access where possible.

Notable Projects:

- IT Request and Inventory Ticketing System. Built from scratch using SQL and Access.
- Developed an Access macro and VBA workflow to automate batch report generation, triggered from a Python/Streamlit dashboard. Implemented timestamp validation and fault-tolerant logic to ensure reliable generation of up to 50 reports per execution.
- Developed a “Yellow Tag” tracking system to automatically flag, record, and report missing production parts using live Syspro ERP data. Improved early-stage variance reconciliation and helped identify recurring inventory issues.
- PDF parsing of legacy reports using Python libraries including pdfplumber, Streamlit, and Pytesseract.

Technologies used:

- Microsoft Excel, Access, VBA, SQL Server, Syspro8 ERP, Python, Streamlit, Pandas, Plotly.

Other Job Experience:

- Basketball Referee – CBOC – Fredericton, NB – Oct 2013 – Mar 2020 – Part-time.
- Kitchen Staff – FMI – Fredericton, NB, -- May 2015 – Sept 2017 – Part & full-time.
- Farm Hand – Hunter Brother’s Farm Market – Florenceville, NB, -- Jun 2011 – Aug 2013 – Seasonal full-time.

Education

Bachelor of Computer Science

UNB – Fredericton N.B. (Sept 2017 – May 2020)

- Specialization: Software Systems.
- Recipient of Governor Thomas Carleton Entry Scholarship.

Skills

- **Languages:** English (native), French (Intermediate professional proficiency).
- **Programming:** Java, Python, SQL, VBA
- **Frameworks & Technologies:** Spring Framework, REST APIs, Streamlit
- **Databases:** SQL Server, Microsoft Access
- **Data & Analytics:** Pandas, Plotly, Excel, Data Validation
- **Automation & Integration:** OCR, PDF parsing, API integration, workflow automation
- **Tools:** Git, Syspro8 ERP, ShopClock

Awards & Activities

- Finalist (Top 12) - Kaspersky Academy Partner's Summit (KAPS) Lisbon, Portugal (December 2019).
- Certified intermediate plus in the French oral proficiency exam (June 2013).
- UNB dormitory Orientation Committee (September 2014) & Social Representative (September 2014 – April 2015).
- UNB Relay for Life steering committee logistics team (September 2013 – February 2014).

Hobbies

3D printing and hardware projects, sports analytics software, recreational athletics (cycling, kayaking, basketball officiating).

Projects

- Developed NHL analytics dashboards using live API data, SQL, Python, and interactive visualizations.
- Built 3D warehouse visualization tools using Plotly to improve operational transparency and layout analysis.
- Developed automation tooling for STL generation and 3D printing workflows using Python and Streamlit.
- Additional exposure includes Android development, OCR tooling, and data visualization applications.
