Dear Hiring Manager,

I am writing to express my interest in the Network Engineer position with McCain Foods.

While my background has been broader than a traditional network engineering path, I believe that experience is one of my strongest assets. Throughout my career I have worked across software development, enterprise systems support, database administration, automation, reporting, and operational technology environments. This has required a strong understanding of infrastructure, connectivity, troubleshooting, and the interaction between business-critical systems.

In my previous roles, I have supported ERP platforms, SQL Server environments, internal applications, reporting systems, and technical users across multiple departments. I have developed automation solutions using Python and SQL, built internal tools that improved operational efficiency, and regularly investigated complex technical issues involving systems, data, and infrastructure. These experiences have strengthened my analytical skills and taught me how to approach technical problems methodically and collaboratively.

What attracts me to McCain is the opportunity to continue expanding my infrastructure and networking expertise within a large enterprise environment. The combination of operational support, network modernization, cloud connectivity, security collaboration, and automation aligns closely with both my existing technical strengths and the direction I want to continue developing professionally. I am particularly excited by opportunities involving automation, scripting, operational improvement, and cross-functional collaboration.

While my experience has been broader than a traditional networking career path, I bring a strong foundation in infrastructure support, automation, troubleshooting, and enterprise systems, along with a demonstrated ability to quickly learn and apply new technologies in business-critical environments. I am confident that my systems background, programming experience, and commitment to continuous learning would allow me to contribute effectively to McCain's Network Services team.

Thank you for your time and consideration. I welcome the opportunity to discuss how my background and technical experience can contribute to McCain Foods.

Sincerely,
Avery Briggs
