Dear Hiring Manager,

I am writing to apply for the Technical Support position in Woodstock, NB. With several years of experience supporting business systems, users, and operational technology within a manufacturing environment, I believe I would be a strong fit for your team.

In my previous role at BWS Manufacturing, I worked closely with employees across multiple departments to troubleshoot technical issues, support ERP and reporting systems, configure equipment, and improve day-to-day operational processes. My responsibilities included assisting users with software and hardware problems, maintaining reporting systems, supporting database operations, coordinating with external IT providers, and helping implement practical technical solutions for business users.

I am comfortable working in fast-paced environments where priorities can shift quickly, and I take pride in being dependable, organized, and approachable when assisting users with technical difficulties. I enjoy practical troubleshooting work and working directly with users to resolve technical issues efficiently. Alongside my systems and troubleshooting experience, I also understand the operational side of business environments and work well with both technical and non-technical staff.

I am legally authorized to work in Canada and would welcome the opportunity to discuss how my background and technical support experience could contribute to your organization. I am open to commuting or relocation for the right opportunity.

Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,
Avery Briggs

Professional Summary

Systems and IT professional with 5 years of experience supporting business users, troubleshooting technical issues, maintaining computer systems, and developing operational solutions within a manufacturing environment. Experienced with user support, ERP systems, Microsoft SQL Server, Microsoft Access, network-connected devices, software deployment, and business process improvement. Known for strong problem-solving skills, adaptability, and providing dependable technical support in fast-paced environments.

Experience

Systems Support & Operations Analyst

BWS Manufacturing Ltd. | Centreville, N.B. (Jan 2021 – Feb 2026)

Developed internal software systems and software development tools supporting operational workflows across Sales, Procurement, Production, and Scheduling within a small technical team in a manufacturing environment.

Key Contributions

- Provided technical support to office and warehouse staff for software, hardware, and network-related issues.
- Assisted users with ERP, reporting, printing, login, and workstation problems.
- Configured and maintained employee computer equipment, printers, scanners, and related peripherals.
- Developed and maintained internal reporting and operational tools using Microsoft Access, SQL Server, and Python.
- Worked with external IT vendors and service providers to coordinate system maintenance, networking, backup, and security-related tasks.
- Assisted with business systems troubleshooting and process improvements across purchasing, production, inventory, and scheduling departments.
- Created user documentation and provided guidance and training for internal software tools.
- Supported database maintenance, data validation, and reporting operations.
- Participated in system improvement initiatives and operational redesign projects.

Systems Analysis & Reporting

- Developed and delivered ad-hoc and recurring reports based on stakeholder requests.
- Experience working with large, multi-source datasets requiring validation and reconciliation.
- Strong proficiency in SQL and advanced Excel for data extraction and analysis.
- Experience designing data outputs that are clear, structured, and actionable.
- Comfortable working with sensitive or business-critical data requiring accuracy and discretion.
- Experience improving reporting processes and enabling self-service data access where possible.

Notable Projects:

- IT Request and Inventory Ticketing System. Built from scratch using SQL and Access.
- Developed an Access macro and VBA workflow to automate batch report generation, triggered from a Python/Streamlit dashboard. Implemented timestamp validation and fault-tolerant logic to ensure reliable generation of up to 50 reports per execution.
- Yellow Tag system to automatically flag, record, and report missed parts when picked for production. Offers a variance reconciliation opportunity earlier in the production pipeline, highlighting common trends. Front-end built using an automatically refreshing form presenting live Syspro Data.
- PDF parsing of legacy reports using Python and modules: Pdfplumber, Streamlit, and Pytesseract.

Technologies used:

- Microsoft Excel, Access, VBA, SQL Server, Syspro8 ERP, Python, Streamlit, Pandas, Plotly.

Other Job Experience:

- Basketball Referee – CBOC – Fredericton, NB – Oct 2013 – Mar 2020 – Part-time.
- Kitchen Staff – FMI – Fredericton, NB, -- May 2015 – Sept 2017 – Part & full-time.
- Farm Hand – Hunter Brother's Farm Market – Florenceville, NB, -- Jun 2011 – Aug 2013 – Seasonal full-time.

Education

Bachelor of Computer Science

UNB – Fredericton N.B. (Sept 2017 – May 2020)

- Specialization: Software Systems.
- Recipient of Governor Thomas Carleton Entry Scholarship.

Skills

- **Languages:** English (native), French (Intermediate professional proficiency).
- **Data & Analysis:** SQL, Python (Pandas), Data Validation, Data Cleaning, Dashboard development using Streamlit.
- **Data Extraction:** OCR (Pytesseract), PDF Parsing (pdfplumber).
- **Reporting:** SQL queries, data analysis, visualization (Streamlit, Plotly, Reportlab, among other tools)
- **Integration:** APIs, Python automation, and workflow automation.
- **Databases:** Microsoft Excel & Access, Microsoft SQL Server.
- **Tools:** Git, Syspro8 ERP, ShopClock.

Awards & Activities

- Finalist (Top 12) - Kaspersky Academy Partner's Summit (KAPS) Lisbon, Portugal (December 2019).
- Certified intermediate plus in the French oral proficiency exam (June 2013).
- UNB dormitory Orientation Committee (September 2014) & Social Representative (September 2014 – April 2015).
- UNB Relay for Life steering committee logistics team (September 2013 – February 2014).

Hobbies

3D printing and hardware projects, sports analytics software, recreational athletics (cycling, kayaking, basketball officiating).

Projects

- Developed NHL analytics dashboards using live API data, SQL, Python, and interactive visualizations.
- Built 3D warehouse visualization tools using Plotly to improve operational transparency and layout analysis.
- Developed automation tooling for STL generation and 3D printing workflows using Python and Streamlit.
- Additional exposure includes Android development, OCR tooling, and data visualization applications.
