3+ years**PAY**
Up to \$50/hr

Full Stack Software Engineer Expert for AI Training

Top engineers don't just use AI, they build it. Review code, evaluate AI outputs, and set the standard. Freelance, remote, up to \$50/hr.

Apply Now **Trustpilot** | 4.0 ★**Earn up to \$50 USD/hr, paid out weekly**

Rates vary based on expertise and project requirements. Paid via PayPal and AirTM

(Remote) United States, Canada, United Kingdom, Australia

Choose your own schedule. Most experts spend 5-10 hrs/week, up to 40 hours

3+ years of full stack experience required

At least 3 years building and shipping production-grade software end to end

About Outlier

Outlier is committed to improving the intelligence & safety of AI models. **Owned and operated by Scale AI**, we've recently been [featured in Forbes](#) for partnering experts with top AI labs to provide the high quality data for LLMs. We believe AI can only perform as well as the data it's trained on. That's why **we work with contributors from all over the world**, who help **improve AI models by providing expert human feedback**. This data has **led to AI advancements for the world's leading AI labs** and large language model builders.

We've built a **best-in-class remote work platform for our freelance contributors** to provide valuable, specialized skills, and we in turn strive to provide them with a positive experience based on our core pillars of reliability, transparency, and flexibility.

"As artificial intelligence becomes ever more capable of mimicking human reasoning, it's increasingly requiring more highly skilled humans, often with specific areas of expertise, to hone its models."

Forbes

A Growing Side Hustle For American College Grads: Fixing AI's Wrong Answers

What you will be doing

- Creating and answering technical questions about software engineering concepts and fullstack development, coding best practices, and debugging strategies to help train AI models.
- Reviewing and evaluating code generated by AI in languages such as JavaScript, Python, Go, Java, TypeScript, and C++.
- Analyzing code quality, maintainability, and adherence to real-world engineering standards.
- Providing expert-level feedback on version control workflows, collaborative coding practices, and effective debugging techniques.

Common Tasks

Choose the right response

You will be given two responses to a question and your task will be to choose the correct response

Response 1

Response 2

Write a prompt

Write simple prompts that will act as a starting point for AI models

What we're looking for

- **3+ years of professional software engineering experience** with full stack development.
- Proficiency in at least two of the following languages: JavaScript, Python, Go, Java, TypeScript, or C++.
- Professional experience building and maintaining production-grade software systems.
- Strong knowledge of Git (or similar version control systems), including experience with branching, merging, and collaborative development workflows.
- Outstanding attention to detail and ability to clearly communicate technical feedback and coding best practices.

Nice to have

- Backend engineering expertise with experience designing and scaling server-side systems.
- Test-Driven Development (TDD) experience and strong testing discipline.
- Experience authoring technical specifications and API contracts.
- Hands-on expertise with testing frameworks such as PyTest, JUnit, Mocha, or similar tools.
- Experience conducting code reviews, debugging complex issues, and analyzing large codebases.
- Zero-to-one experience as a founding engineer or early employee at a startup.

Compensation and benefits

Earn up to \$50 USD per hour, paid out weekly

Rates vary based on quality, accuracy, and time spent. Paid via PayPal & AirTM

Join a global community of Coding experts

Join a global network of experts contributing to advanced AI tools

Flexible schedule and time commitment

No contracts, no 9-to-5. You control your schedule. (Most experts spend 5-10 hours/week, up to 40 hours working from home)

Free access to Model Playground

Interact, experiment and engage with leading large language models free of cost

Disclaimer: For non-core work, such as during initial project onboarding or project overtime phases, lower rates may apply. Certain projects offer incentive payments. Please review the payment terms for each project.

Equal Opportunity Employer: Outlier is committed to fostering a diverse and inclusive work environment. We welcome applicants from all backgrounds and celebrate diversity in our workforce.

Read about how MIT PhD Daniel Z earns extra income on Outlier

"Daniel has enjoyed the combination of earning extra cash while contributing to AI development and has made over \$4,000 on Outlier".

[Read Daniel's Story](#)

I view Outlier as a great opportunity for contributors to work flexibly, improve their skills, and earn more money at their own pace. **Working with other contributors on Outlier makes the experience even more engaging, offering a perfect mix of collaborating and earning.**

Vaibhav P.

India

Code Expert

As an engineer, I often use AI models to get the right answers, but this experience is the opposite: I need to make the models generate wrong answers. **It is strange, exciting, and unforgettable.**

Cuong N.

Vietnam

Code Expert

The result is fewer tasks returning to the queue for all contributors, **higher-quality tasks being completed correctly on the first attempt, and happier contributors thanks to easy access to high-touch, technical support channels.**

Umair K.

Canada

Code Expert

Application and Onboarding Process:

STEP 1

Create an account
on Outlier

STEP 2

Verify your identity and phone number

STEP 3

Pass a
skill assessment

STEP 4

Start earning by
completing tasks
