Dear Hiring Manager,

I am writing to express my interest in the IT Systems Analyst position with Medavie.

Over the past five years, I have worked as a Systems Analyst and Database Developer in a manufacturing environment, where I have been responsible for maintaining, troubleshooting, and continuously improving business-critical systems supporting operations across multiple departments. My role has required a high degree of ownership, working with incomplete documentation and complex system interactions to diagnose issues, implement solutions, and support end users—closely aligning with the responsibilities outlined for this position.

In my current role, I administer and support Microsoft Access and SQL Server-based systems integrated with ERP platforms. I regularly investigate production issues using data analysis, system behavior, and direct collaboration with stakeholders to identify root causes and implement reliable solutions. This includes debugging queries and application logic, improving performance, and ensuring data integrity across systems.

A key aspect of my work involves acting as a liaison between technical systems and business users. I collaborate with stakeholders to gather requirements, translate technical findings into actionable insights, and deliver enhancements that improve system usability and operational efficiency. I am comfortable managing multiple priorities, including ongoing support, incident resolution, and system improvements in a live high-availability production environment.

While my experience is primarily within the Microsoft ecosystem, I have developed a strong foundation in database systems, scripting, and system integration, and I have a proven ability to quickly learn and adapt to new systems and technologies, including Oracle, PL/SQL, and legacy environments.

I am particularly interested in this role because of Medavie's focus on improving healthcare services for Canadians. The opportunity to apply my systems analysis and troubleshooting skills in a mission-critical environment is highly motivating.

Thank you for your consideration. I would welcome the opportunity to discuss how my experience can contribute to your team.

Sincerely,
Avery Briggs
