Dear Hiring Manager,

I am excited to apply for the Reporting & Analytics Specialist position at McCain Foods.

Over the past five years, I have worked in a data-focused systems role where I regularly fulfilled internal reporting needs by extracting, validating, and analyzing data across multiple operational systems. My experience includes responding to stakeholder requests, building recurring reporting workflows, and ensuring data accuracy across inventory, procurement, and production datasets.

In my role at BWS Manufacturing, I frequently translated business questions into structured data outputs—delivering reports, dashboards, and ad-hoc analysis used by multiple departments. This often required cross-referencing data between systems, identifying inconsistencies, and ensuring results were both accurate and meaningful. I also developed processes to improve reporting reliability and reduce manual effort, helping teams access data more efficiently.

I am particularly drawn to this role's focus on service delivery and stakeholder support. I am comfortable managing multiple requests, communicating with users to clarify requirements, and ensuring outputs meet both business needs and data governance expectations. My experience working with sensitive operational data has reinforced the importance of accuracy, discretion, and structured processes.

Technically, I bring strong experience with SQL, Excel, and Python for data analysis and reporting workflows. I have also built automated data pipelines and reporting tools that support recurring business needs and improve decision-making.

I am highly motivated by opportunities to improve how organizations use data, and I would welcome the opportunity to contribute to McCain's HR reporting and analytics team.

Thank you for your time and consideration.

Sincerely,
Avery Briggs

Professional Summary

Data-focused Reporting & Analytics Specialist with 5+ years of experience delivering accurate, actionable insights across complex operational systems. Skilled in SQL, Excel, and data workflows involving extraction, validation, and reporting. Proven ability to respond to stakeholder requests, build dashboards and recurring reports, and ensure data integrity across multiple sources. Strong attention to detail, communication skills, and experience working with sensitive data in structured, process-driven environments.

Experience

Data Systems Analyst / Database Developer

BWS Manufacturing Ltd. | Centreville, N.B. (Jan 2021 – Feb 2026)

Developed internal software systems and software development tools supporting operational workflows across Sales, Procurement, Production, and Scheduling within a small technical team in a manufacturing environment.

Key Contributions

- Responded to internal data and reporting requests by extracting, analyzing, and presenting data from multiple operational systems.
- Developed recurring reports and dashboards to support decision-making across Sales, Procurement, and Production teams.
- Validated and reconciled data across systems (ERP, internal tools) to ensure consistency, accuracy, and reliability.
- Translated business requirements into structured data outputs, including reports, summaries, and analytical insights.
- Identified and investigated data discrepancies, performing root-cause analysis across systems and historical records.
- Built automated workflows using SQL and Python to improve reporting efficiency and reduce manual processes.
- Maintained high data quality standards by implementing validation rules and checks for incomplete or inconsistent data.
- Collaborated with stakeholders to clarify reporting requirements and deliver accurate, user-focused outputs.
- Supported process improvements by identifying opportunities for better data access, reporting, and system usage.

Reporting & Analytics Experience

- Developed and delivered ad-hoc and recurring reports based on stakeholder requests.
- Experience working with large, multi-source datasets requiring validation and reconciliation.
- Strong proficiency in SQL and advanced Excel for data extraction and analysis.
- Experience designing data outputs that are clear, structured, and actionable.
- Comfortable working with sensitive or business-critical data requiring accuracy and discretion.
- Experience improving reporting processes and enabling self-service data access where possible.

Notable Projects:

- IT Request and Inventory Ticketing System. Built from scratch using SQL and Access.
- Developed an Access macro and VBA workflow to automate batch report generation, triggered from a Python/Streamlit dashboard. Implemented timestamp validation and fault-tolerant logic to ensure reliable generation of up to 50 reports per execution.
- Yellow Tag system to automatically flag, record, and report missed parts when picked for production. Offers a variance reconciliation opportunity earlier in the production pipeline, highlighting common trends. Front-end built using an automatically refreshing form presenting live Syspro Data.
- PDF parsing of legacy reports using Python and modules: Pdfplumber, Streamlit, and Pytesseract.
- 3D warehouse visualization using Plotly, demonstrating bottlenecks and improving transparency.

Technologies used:

- Microsoft Excel, Access, VBA, SQL Server, Syspro8 ERP, ShopClock, Python, Streamlit, Pandas, Plotly, Pytesseract, Reportlab, CustomTkinter, NeWare Security.

Other Job Experience:

- Basketball Referee – CBOC – Fredericton, NB – Oct 2013 – Mar 2020.

Education

Bachelor of Computer Science

UNB – Fredericton N.B. (May 2020)

- Specialization: Software Systems.
- Recipient of Governor Thomas Carleton Entry Scholarship.

Skills

- **Languages:** English (native), French (Intermediate professional proficiency).
- **Data & Analysis:** SQL, Python (Pandas), Data Validation, Data Cleaning, Streamlit modeling.
- **Data Extraction:** OCR (Pytesseract), PDF Parsing (pdfplumber).
- **Databases:** Microsoft Excel & Access, Microsoft SQL Server.
- **Tools:** Git, Syspro ERP, ShopClock.

Awards & Activities

- Finalist (Top 12) - Kaspersky Academy Partner's Summit (KAPS) Lisbon, Portugal (December 2019).
- Certified intermediate plus in the French oral proficiency exam (June 2013).
- UNB dormitory Orientation Committee (September 2014) & Social Representative (September 2014 – April 2015).
- UNB Relay for Life steering committee logistics team (September 2013 – February 2014).

Hobbies

3D printing and hardware projects, sports analytics software, recreational athletics (cycling, kayaking, basketball officiating).

Projects

- NHL data analysis dashboard displaying real-time game data and standings using the NHL Stats API.
- STL file generation for automating the creation of strings of text using custom fonts and other parameters. Uses a Solid2 to generate files, and Streamlit interface to model and tweak them.
- Minesweeper Android mobile application, built using Java and Android Studio.
- Image editing Android application taking advantage of the Gestures library to offer a unique interface for tuning photos.
- Traffic simulation engine using Pygame. Mimics some elements from Cities Skylines traffic patterns.
- COVID-19 interaction simulator built with JavaFX modeling contagion spread in configurable populations.
