Dear Hiring Manager,

I am writing to express my interest in the Senior System Analyst position with Service New Brunswick's Health Services Division.

Over the past five years, I have worked as a Software Systems and Database Developer at BWS Manufacturing, where I have been responsible for designing, maintaining, and continuously improving database-driven systems that support operational workflows across multiple departments. My work has focused heavily on system reliability, data integrity, and user adoption—areas that closely align with the responsibilities of supporting and advancing a province-wide CMMS.

In my current role, I administer and enhance Microsoft Access and SQL Server-based systems used for inventory tracking, reporting, and operational coordination. This includes monitoring system performance, troubleshooting issues, supporting end users, and implementing enhancements based on evolving business needs. I regularly collaborate with stakeholders across departments to gather requirements, identify gaps, and deliver practical, maintainable solutions.

A key part of my work involves integrating systems and automating workflows using SQL, VBA, and Python, as well as developing reporting tools and data visualizations to support decision-making. I have also contributed to system standardization and documentation, helping ensure consistency, reliability, and ease of use for a wide range of users.

I am particularly interested in this role because of its focus on supporting healthcare technology and improving service delivery for New Brunswickers. I am motivated by opportunities where my technical and analytical skills can contribute to meaningful, real-world impact.

I am fully bilingual (English and French – intermediate professional proficiency) and comfortable working collaboratively in team environments while also managing independent responsibilities.

Thank you for your consideration. I would welcome the opportunity to discuss how my experience in systems analysis, database administration, and stakeholder support can contribute to the continued success of Service New Brunswick.

Sincerely,
Avery Briggs
